FUEL WATER SEPARATORS

Sierra offers a complete line of 10 and 21 micron fuel water separating filters including drainable bowl filters to protect your carbureted and fuel injected engine.

Refer to pages 136-140 for a complete listing of OEM and universal applications.

Sierra fuel water separators remove over 99.8% of emulsified water from your gasoline. Sierra's 10 micron filters are over 90% efficient at removing particles as small as 10 micron. All filters flow @ 90 GPH to feed even the hungriest motor. Sierra 10 micron filters are recommended to prevent damage to sensitive inboard and outboard fuel injection systems.

V-BELTS

- 1 High strength synthetic cords resist shockload failure. Their low stretch properties assure uniform performance over the life of the belt.
- 2 The compression section is a special rubber compound that assures smooth and even transfer of load forces to the cords.
- 3 Cogs are molded to precise engineering tolerances to improve flexibility and maintain cord support. Cog geometry provides a large area for air circulation to keep the belt cool and prevent damaging heat build up in the cushion section.
- 4 Rubber edges maintain positive, no-slip contact with pulley grooves for reliable energy transfer.
